February 1, 2021

Licensees,

We recognize that the COVID-19 pandemic has presented numerous challenges, forcing you to continually adapt while trying to keep your employees and their families safe. We are eager to support your existing efforts with information regarding the COVID-19 vaccine. Getting the COVID-19 vaccine gives you and your employees an added layer of protection.

The [Immunize Nevada website](#) provides the most up to date information on COVID-19, the vaccine roll out plan and a link for individuals to [sign-up](#) and be notified when it is their turn. I have also attached two flyers to post and distribute within your company to help spread the word regarding vaccinations and where to sign-up. This information will also be available on our website's homepage.

COVID-19 vaccines are one of the essential tools to slow the pandemic. In addition to getting the vaccine, you should continue to follow all current COVID-19 guidelines, including wearing a mask and staying at least 6 feet from others to help reduce exposure to or spread of the virus. Following all steps will ensure that, together, we can control this pandemic.

Thank you and stay safe,

A handwritten signature in black ink, appearing to read "Lori Irizarry".

Lori Irizarry
Chief of Operations

Protect From COVID-19.

**You risk being exposed to people
with COVID-19 every day.**

Vaccines will be available across Nevada soon -

Key Messages

You can help stop the pandemic by getting a COVID-19 vaccine.

To stop this pandemic, we need to use all our prevention tools. Vaccines are one of the most effective tools to protect your health and prevent disease. Vaccines work with your body's natural defenses so your body will be ready to fight the virus if you are exposed (also called "immunity").

In the coming months, doctors' offices, retail pharmacies, hospitals, and clinics will offer COVID-19 vaccine. Your doctor's office or local pharmacy may have contacted you with information about their vaccine plans. If not, you can [contact your state or local health department](#) to find out when and where vaccines will be available in your community.

COVID-19 vaccines are safe and effective

The U.S. vaccine safety system makes sure that all vaccines are as safe as possible. Learn how the federal government is working to ensure the [safety of COVID-19 vaccines](#).

CDC has developed a new tool, [v-safe](#), to help us quickly find any safety issues with COVID-19 vaccines. **V-safe** is a smartphone-based, after-vaccination health checker for people who receive COVID-19 vaccines. Download the **v-safe** app after you are vaccinated!

Studies show that COVID-19 vaccines are very effective at keeping you from getting COVID-19. Experts also think that getting a COVID-19 vaccine may help keep you from getting seriously ill even if you do get COVID-19. These vaccines **cannot** give you the disease.

COVID-19 vaccine will be free for you.

The federal government is providing the vaccine free of charge to people living in the United States. However, your vaccination provider may bill your insurance company, Medicaid, or Medicare for an administration fee.

After COVID-19 vaccination, you may have some side effects. These are normal signs that your body is building protection.

The side effects from COVID-19 vaccination may feel like flu and might even affect your ability to do daily activities. Most of these side effects should go away in a few days.

You will still need to wear a mask and socially distance after getting each shot of the vaccine for now.

As experts learn more about how COVID-19 vaccination may help reduce spread of the disease, CDC will continue to use the latest science to update the recommendations for protecting communities.
